Easily search, filter, and sort the most extensive Intelligence Channel Gallery

The screenshot displays the TX360 Channels interface. On the left is a dark sidebar with navigation options: Home, Dashboards, Channels, Assets, Notifications, Workspaces, Groups, and Subscribers. The main content area is titled "Channels" and includes a search bar with the text "Enter name, keyword, or category" and a "Go!" button. Below the search bar are filter sections: "FILTER RESULTS BY:" with a "clear all" link, "FEATURED TOPICS" (Disease, Environmental, Food, Healthcare), "REGION", "RATING" (with star icons), and "DATA TYPE" (Has Location Data). A dropdown menu shows "Public Health" selected. At the top right, there are "Public Channels" and "Sort By Rating" dropdowns, and a user profile "Help | john.smith@swanislnd.net". The main area contains a grid of channel cards, each with a logo and a title. The cards include: CDC (US Centers for Disease Control ... US Outbreaks), US Department of Health and H... Health Emergency Declarations, FDA (US Food & Drug Administration Alerts & Recalls), US Public Health Emergency Of... Active Federal Public Health Act..., US Public Health Emergency Of... Active Public Health Situation U..., World Health Organization Ebola News, World Health Organization Featured Stories, World Health Organization Maternal, Newborn, & Child Heal..., World Health Organization Organization News, Air Pollution Control Division (@... Colorado Air Pollution News and..., AirNow Dallas-Fort Worth Air Quality For..., and AirNow Denver Air Pollution Action Day ... At the bottom, there are buttons for "Import RSS Feed", "+ Create Channel", and "Publish an Event".

About Swan Island Networks: Situational Awareness and Smart Alerting Made Easy.

Swan Island Networks has been a leader and innovator in situational intelligence and Smart Alerting for over a decade. Swan Island's TX360® platform helps you make faster, better informed decisions with highly relevant real-time alerts and a comprehensive common operating picture.

Founded in 2002 by 20-year veterans of the cyber security industry, Swan Island Networks began as a software engineering lab working with the US government, focusing on R&D programs. The company has participated in a dozen contracts with government agencies such as the Department of Defense, Homeland Security, and various intelligence organizations.

In 2009, Swan Island Networks launched the Trusted Information Exchange Service (TIES®). Designed to optimize intelligence aggregation, filtering, and distribution for the physical and cyber security industries, TIES now supports and helps protect more than 250 large enterprises and 20% of Fortune 100 companies every day.

In 2014, Swan Island announced a new partnership with Microsoft and launched TIES for Microsoft CityNext, providing situational intelligence services to city, state, and county leaders; schools safety officers and administrators; CIOs; and emergency management and safety personnel.
