KEY FEATURES

- ▶ **CLOUD BASED:** Microsoft's Azure cloud provides high availability, scalability, redundancy, and TX360 distributed capability.
- ▶ **EASY TO USE:** Exec and field recipients can receive intelligence without training. Pro users have a short learning curve for full range of creation capabilities.
- ▶ **RAPID TO DEPLOY:** Hours versus weeks for other solutions.
- ▶ **SCALABLE:** TX360 can be scaled from a few users to thousands of users.
- ▶ **CUSTOMIZABLE:** The TX360 content can be customized without programming by customer personnel.
- ▶ **SECURE:** TX360 is a protected environment, allowing control of who receives information.
- ▶ **INTEROPERABLE:** TX360 has a wide range of standard connection points (GEORSS, Common Alerting Protocol, Twitter) and an API for custom integrations.
- ▶ **WORKFLOWS:** TX360 can work on an automated basis or in conjunction with analysts to further curate information.

INTELLIGENCE CHANNELS

Choose from 1,000+ Channels in our gallery of trusted intel sources.

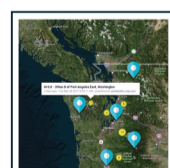

SMART ALERTS

Receive and deliver breaking alerts via email, SMS, text-to-voice, social networks, and more.

DASHBOARDS

Centralize and monitor threats in real time on a common operating picture Dashboard.

ASSET MONITORING

Import your corporate Asset locations into TX360 and visualize them on Dashboards.

THE TX360 DIFFERENCE

- ▶ Achieve faster response to threats via proactive and continuous monitoring.
- ▶ Cover more ground and streamline operations through aggregation and visualization of multiple information sources.
- ▶ Deploy in hours, not months – obtain world class situational awareness and threat monitoring capabilities **today**.

Metropolitan Resilience Network in New York City is powered by TX360 and used by over 400 organizations in the NY metro area.

Allied Universal GSOC as a Service – TX360 provides the core situational awareness for the Monitoring and Response Center.
