## Alerting Service

Delivering timely, targeted global intelligence that you need to stay ahead of security threats that may impact your business, assets and people.

THE ALERTS YOU NEED TO MANAGE  
EVER-EVOLVING SECURITY RISKS AT THE  
INDUSTRY'S MOST AFFORDABLE PRICES

**Global Alerting:** Breaking global intelligence based on machine-automated & analyst-curated content delivered in email or text format.

**Real-Time Intelligence Feeds:** Relevant alerts extracted from 1000's of information sources through machine learning methods, smart filtering and human-powered publication.

**24/7 Visual Dashboards:** Integrated visual display of alerts and incidents related to security, severe weather, transit, disasters, and industry, accessible 24/7 to support GSOC and command center operations.

**Analyst Services:** Professional analyst team providing content and insight into global alerts and dashboards also available for special reporting, consulting and customization.

**Scalable Platform Services:** Built on a proven, scalable and high-performance platform for real-time event alerting, processing 500,000 transactions per day from thousands of sources around the world.

**Rapid Deployment:** Get a jumpstart today with digital subscription options.

Worldwide Health

The screenshot displays the TX Global alerting service interface. It features a central world map with location pins indicating alert locations. Surrounding the map are several news feeds and dashboards. On the left, there are sections for 'Health Alerts (Past 30 days)', 'International institutions to remain closed', and 'Government imposes sweeping'. The main news feed includes an article titled 'Italy: All businesses except pharmacies, grocery stores and banks ordered to close in effort to contain COVID-19 spread', published to TX Global - Severe at March 11, 2020, 02:36:00 PM PT. Other news items include 'UK's slow, steady coronavirus strategy stokes', 'India reports second death from coronavirus', and 'Like the flu? Trump's coronavirus messaging'. On the right, there are sections for 'Outbreaks in the News (Past 24 hours)', 'CDC, WHO, ECDC (Past 7 days)', and 'Measles & Rubella Weekly Monitoring Report'. At the bottom, there is a '2019-nCoV Coronavirus Dashboard' and a 'Resources & Links' section.

# Pricing

With the ever-changing landscape of global and local threats, early and comprehensive monitoring of emerging risks is more crucial than ever! TX Global is a break-through, real-time global intelligence alerting service, providing highly relevant security alert coverage for a range of hazards.

This subscription intelligence service offers a hybrid alerting model incorporating premium, analyst-curated content and machine-automated, real-time alerts. Smart Alerts are delivered via email or text, and 24/7 real-time dashboards are monitoring on an ongoing basis.

Subscription options start as low as \$99/mo, with multiple options to further personalize content by geolocation, topic and industry. TX Global accounts can also be scaled up and configured to fit the needs of any size organization.
